## Boehner Praises the Republican Study Committee's Economic Growth Package

WASHINGTON, D.C. – House Republican Leader John Boehner (R-OH) issued the following statement praising an economic growth package unveiled today by the Republican Study Committee, led by Rep. Jeb Hensarling (R-TX):

*"This package contains essential components to ensure long-term U.S. economic growth, not just this quarter or this year, but for many years to come. It includes robust policies to reduce the tax burden on both middle-class families and employers who provide good-paying jobs to millions of Americans. And it will be an impetus for a discussion in the coming weeks and months about our long-term economic future. I thank Chairman Hensarling and others from the Republican Study Committee for offering this plan, which will serve as an important contribution as Republicans continue our fight for pro-growth policies that help create new jobs and address the concerns of middle-class families."*
